

**Camp-let**<sup>®</sup>

The award winning trailer tent

# Gives you the best holiday

# Welcome to The World of Camp-let

## Time and freedom for all kinds of fun

A Camp-let gives you the chance to enjoy camping at its best. Without skimping on luxuries such as a kitchen, high-quality beds, a large lounge, plenty of luggage space – and much more besides.

The compact size makes easy handling when not attached to the car, provides a clear view whilst towing and requires little storage space.

A Camp-let is designed to be as easy as possible to set up and pack away again, leaving you time for all the fun things you want to do on your holiday.

## Quick setup – 3 simple steps

Three simple steps and a matter of minutes – and you're ready to enjoy your holiday.

A built in spring system means one person can open a Camp-let with no need for additional assistance.

**1.** The built in kitchen swings out - all kitchen models can be used en-route.

**2.** The trailer opens up. A practical spring system helps you open and close the trailer.

**3.** The large awning and sleeping compartments open in a single movement.

## Clever details

- to make life a little easier

**Acrylic tent** | Camp-let is the only trailer tent manufacturer, who exclusively produces trailer tents with a breathable acrylic tent from Isabella.

**Storage after your holiday** | Using a storage bracket, the trailer can be side stored and wheeled into the garage. For details of the storage bracket, see optional extras.

**A helping hand** | A Practical build in springsystem helps with opening and closing the trailer. The build in spring system, makes it easy for one person to do the setup.

**Easy mounting of optional extras** | The integrated aluminium roof bars give you the option of easily fitting optional extras as required

## Environment and economy – hand in hand

- ✓ Minimum additional fuel consumption
- ✓ Low weight – easy to tow
- ✓ Low profile – a clear rear view
- ✓ More comfortable to tow than a caravan

Whilst towing a Camp-let you have an unobstructed rear view, only a slight increase in fuel and the low towing weight (250 kg - 275 kg) means the vast majority of cars can tow one.
