# Jametic ECO by Jamet

## Imported by Camperlands Ltd.

Introducing the Jametic ECO, an innovative and ecological folding trailer tent that marks a significant shift towards sustainability. Jamet continues its tradition of pioneering advancements in the market, and the Jamet ECO stands out for its commitment to environmentally friendly materials, whilst maintaining the highest quality.

The TenCate material is recognised as the world's best tent cloth and the eco material is produced with no reduction in quality or performance. The Jametic ECO sets a new standard in eco-conscious camping.

The tent's wall, roof and inner tent materials are crafted from TenCate Ecoline consisting of blue jeans, organic cotton and recycled polyester. The awning zip-in groundsheet incorporates approximately 16 recycled PET bottles per square meter.

### ECO friendly manufacturing

- Decreases the CO2 footprint
- Cuts down on energy use and costs
- Conserves water during the production process
- No change to Jamet's high quality standards

The Jamet Jametic design stands as the best-selling model in Holland, and as the saying goes, "every Dutchman has 2 trailers!" The popularity of this design is easily understandable, allowing you to make a confident purchase with its proven features. Simultaneously, by choosing this model, you contribute to making a positive impact on our planet.
