WITH FOAM MATTRESS**

**NEW FOR 2018  
CAMPMASTER 1000L TRAILER**

## DESIGN

If you're not as mobile as you used to be or are a seasoned camper fed up with faffing about with framework, the Airbeam inflatable tent will make life easy again. Meanwhile, the off-ground sleeping, luxury mattress and sealed bedroom will let you sleep in comfort and bug-free for those who want to get into camping without going completely back to basics.

Designed from the start with ease and comfort in mind, the new Campmaster Air is intended to open the joys of Trailer Tent camping to a new group of people. Combining the ease and simplicity of an inflatable tent with an ultra-compact, lightweight trailer. Whether you're novice campers or uncertain about towing, the Campmaster Air will give you the gentlest introduction to both worlds, and ensure you happily keep coming back for more

## TRAILER

As the most compact and lightweight tent trailers available, the Campmaster Air's minimal side profile mean side winds and snaking are simply not an issue. Also at only 1 metre wide you have no worries about going wide around bends or the trailer cutting corners. It will stay within the wheel tracks of the car in all but the tightest of Alpine hairpins.

The miniature dimensions mean there is no vision obstruction and its extreme low weight make for pleasurable towing and mean any modern road car will deal with hills with ease. Novice towers will find the Campmaster easy to handle and experienced towers will feel a burden lifted.

## MULTIPURPOSE

Although the Campmaster AIR is predominantly a full blown trailer tent, by removing 4 bed bolts you have a fully functional 600/1000 litre luggage trailer for a multitude of uses.

The price also includes the Airbeam tent- original inner tent and storage bag so you can use the tent on its own if required.

## STORAGE WHEN NOT IN USE

The minimal dimensions also mean minimal storage and the fibre-glass body can never rot or corrode. Suitable for outside storage, or otherwise will take up minimal space in the garage, the Campmaster is durable, weatherproof and almost maintenance free.

There are also an end storage bracket and an outdoor storage cover available as optional extras.

## TENT

The starting point for the Campmaster Air is a specially modified version of an Airbeam tent from one of the market leaders. Specially selected for its high quality polycotton outer which combines warmth and durability. The built in ventilation ensures the Campmaster remains cool and comfortable on warmer days and combines with the sealed groundsheet and cotton inner to retain heat through the night. Complete with built-in canopy the tent has only 4 inflatable beams so pitching couldn't be easier.

The price includes the innertent and bag so you can use the Airbeam as a proper tent.

## BEDROOM AREA

One of the key attractions of Trailer Tents over 'basic' camping is sleeping off the ground on a warm, soft bed. And so the Campmaster Air delivers with a full double 4' 6" bed on luxury foam which cushions and insulates. Set in a zip sealed inner tent with steep, vertical walls which ensure the Campmaster bedroom never feels claustrophobic and made from thick natural cotton to retain heat and remain snug.

There are no mid-night stumbles across the campsite with the Campmaster Air with a bedside toilet chamber and private dressing room next to the bedroom.

To increase comfort and storage within the tent there are several optional extras such as bed skirt pockets, memory foam topper and divider walls with mirror etc.

## LIVING AREA

Sealed, cosy, draft-proof and carpeted - at night the tent living area is a cosy, private haven for 2 people with space for table and chairs. But pull back the window covers and find yourself surrounded by light in a bright and airy living space for during the day. Later on, sit out under the canopy for BBQs on sunny evenings and drinks on starry nights.

Looking for more space? Add an optional vestibule. Available in mess as shown, or material with window.

## STORAGE

Once erected the lid of the trailer becomes an easy to access and ample storage space for clothes, equipment and any camping essentials required for your trip. The optional skirt gives plenty of handy pockets for storage as well as finishing the trailer body off

Using the optional divider wall this gives a private area perfect for a portable toilet and changing area.
